My story @ Open Source

Improve yourself as developer

Presented by

Robert Lu (robberphex)

Fedora Community
Anjuke, Inc

Today's Topics

1. My experience

2. The Type of open source project

3. How to contribute in real life

fedora

1. My experience

from use to contribute

As a user

- High school

- Install Ubuntu

- The graphic driver

- Ask question at Ubuntu Chinese Forum

- Want to be a developer

- Included F20 rel party?

fedora

I have some problem

- Donghua University
- Try new tech with Fedora

- Translate
  - For Fedora, GNOME extensions
- Fix bugs
  - Atom atom-latex
  - pypa/pip

fedora

I have a plan

- After graduation
- I am a PHP developer(and ops)

- *Ansible improve deploy_helper*
- *Composer improve install speed*
- *Pkgist make a mirror of packagist.org*

  Learned more about OS

fedora

Now

- a PHP developer(and ops)

- Using Open Source
- Report problem I meet (maybe fix)
- Focus php tools (composer, etc)

  Make a difference

fedora

My contribution

222 contributions in the last year

📖	Homebrew/**formula-patches**	14 ★
📖	apache/**incubator-predictionio**	10.4k ★

📖 RobberPhex / **pkgist**

‹› Code ⓘ Issues **1** ⤵ Pull r

make mirror of https://packagist.org

composer   packagist   mirror   Manage

fedora

2. Type of open source project

Personal project

- Many useful tool
- Can grow bigger

- Good for starter
- You can make a big improvement on it.

fedora

Project hold by community

- Such as composer/homebrew?
- apache/thrift, numpy/numpy

- standardized contribute guide
- You can learn more from others.

fedora

Project hold by enterprise

- Tengine?
- WizNote

- Maybe affected by enterprise policy
- Full-time developer
- But you can always fork it.

fedora

Project hold by Organization

- Openstack, Kubernetes

- governed by organization and enterprise
- Maybe impress by enterprise policy
- "check and balance"

fedora

3. How to contribute in real life

I have a problem

- Report it
  - Issues
  - Mailist

- Fix it by self

- Learn how to avoid problem

fedora

I have a plan

- Let maintainer/developer know
- Just try it
- It needn't be perfect

- Submit pr, patches

- Improve self
- Make software better.
